

2018 Eligible Measure Applicability (EMA) for Registry Data Submission of Individual Quality Measures

MIPS Clinically Related Measure Analysis Used in EMA

Clinical Relation including an Outcome/High Priority Test of the 2018 Registry Data Submission of Individual Quality Measures

Note: Registry measures submitted by Qualified Registries that do not have any eligible instances for a clinically related measure should be submitted as 0/0. The analysis of the data would account for this when evaluating the score as it is related to EMA. Qualified Registries do not need to submit anything else to CMS for this scenario as the vendors attest that data they submit has been validated and is true, accurate, and complete to the best of their knowledge. If the vendor is selected for auditing, this may be one of the items audited to determine that the data submitted was true, accurate and complete.
