Quality ID #467 (NQF 1448): Developmental Screening in the First Three Years of Life – National Quality Strategy Domain: Health and Well-Being

2018 OPTIONS FOR INDIVIDUAL MEASURES:
REGISTRY ONLY

MEASURE TYPE:
Process

DESCRIPTION:
The percentage of children screened for risk of developmental, behavioral and social delays using a standardized screening tool in the 12 months preceding or on their first, second, or third birthday. This is a composite measure of screening in the first three years of life that includes three, age-specific indicators assessing whether children are screened in the 12 months preceding or on their first, second or third birthday.

INSTRUCTIONS:
This measure is to be submitted at least once per performance period for patients seen during the performance period. There is no diagnosis associated with this measure. This measure may be submitted by eligible clinicians who perform the quality actions described in the measure based on the services provided and the measure-specific denominator coding. Eligible clinicians should continue to submit the measure as specified, with no additional steps needed to account for multiple performance rates.

*NOTE: The intent of this measure is to calculate a Total Performance Rate based on all children who turned 1, 2, or 3 during the performance period who were screened for risk of developmental, behavioral and social delays using a standardized tool with interpretation and report within 12 months preceding or on their birthday, i.e., the sum of denominators 1, 2, and 3.

Measure Submission:
The listed denominator criteria is used to identify the intended patient population. The numerator options included in this specification are used to submit the quality actions allowed by the measure. The quality-data codes listed do not need to be submitted for registry-based submissions; however, these codes may be submitted for those registries that utilize claims data.

THERE ARE THREE SUBMISSION CRITERIA FOR THIS MEASURE:

1) Children in the eligible population who turned 1 during the performance period. (Birth to 1 year of age) who were screened for risk of developmental, behavioral and social delays using a standardized tool with interpretation and report within 12 months preceding or on their birthday

OR

2) Children in the eligible population who turned 2 during the performance period (> 1 year to 2 years of age) who were screened for risk of developmental, behavioral and social delays using a standardized tool with interpretation and report within 12 months preceding or on their birthday

OR

3) Children in the eligible population who turned 3 during the performance period ( > 2 years to 3 years of age) who were screened for risk of developmental, behavioral and social delays using a standardized tool with interpretation and report within 12 months preceding or on their birthday
DENOMINATOR:
All patients who turn 1, 2 or 3 years of age between January 1 and December 31 of the performance period.

Denominator Criteria (Eligible Cases):
SUBMISSION CRITERIA 1: Children who turned 1 during the performance period (Birth to 1 year of age)
SUBMISSION CRITERIA 2: Children who turned 2 during the performance period (> 1 year to 2 years of age)
SUBMISSION CRITERIA 3: Children who turned 3 during the performance period (> 2 years to 3 years of age)
AND
Patient encounter during the performance period (CPT or HCPCS): 99201, 99202, 99203, 99204, 99205, 99212, 99213, 99214, 99215
WITHOUT
Telehealth Modifier: GQ, GT, 95, POS 02

NUMERATOR (SUBMISSION CRITERIA 1 & 2 & 3):
Children who were screened for risk of developmental, behavioral and social delays using a standardized tool.

Numerator Instructions: For the purposes of submitting this measure:
For those registries that utilize claims data, the Performance Met Numerator Option G9966 or equivalent can be submitted if CPT code 96110 (Developmental testing, with interpretation and report) is submitted within the 12 months preceding or on the patient's birthday during the age stratified episode of care (e.g., children who turn 12 months of age, 24 months of age and 36 months of age during the performance period). The submission of the CPT 96110 code and documentation of the denominator eligible patient encounter do not need to occur simultaneously.

The Performance Met Numerator Option G9966 or equivalent can be submitted if the equivalent documentation of a global developmental screening utilizing a standardized tool as defined below within the medical record review and standardized tool definitions are contained in the patient’s medical record within the 12 months preceding or on the patient's birthday during the age stratified episode of care (e.g., children who turn 12 months of age, 24 months of age and 36 months of age during the performance period). This measure is anchored to standardized global developmental screening tools that meet four criteria specified below in the Standard Tool definition that identify risk for developmental, behavioral, and social delays.

The Performance Not Met Numerator Option G9967 should be submitted when utilizing CPT Codes 96111, 96127, standardized screening utilizing the ASQ-SE tool, autism M-CHAT tool or when using standardized development screening tools that are specifically focused on one domain of development (e.g., child’s socio-emotional development or autism).

If the eligible clinician is unable to determine if the documented screening tool meets the Standard Tool definition than submit the Performance Not Met Numerator Option G9967.

Definitions:

Medical Record Review: Children who had documentation in the medical record of screening for developmental, behavioral and social delays using a validated standardized tool as defined within the measure specification in the 12 months preceding or on their birthday. Documentation must include a note indicating which standardized tool was used, the date of screening, and evidence that the tool was completed and scored.

Standardized Tool: Are tools that have been normed and validated and must meet the following criteria:
Developmental domains: The following domains must be included in the standardized developmental screening tool: motor, language, cognitive, and social-emotional.

2. Established Reliability: Reliability scores of approximately 0.70 or above.

3. Established Findings Regarding the Validity: Validity scores for the tool must be approximately 0.70 or above. Measures of validity must be conducted on a significant number of children and using an appropriate standardized developmental or social-emotional assessment instrument(s).

4. Established Sensitivity/Specificity: Sensitivity and specificity scores of approximately 0.70 or above.

Examples of standardized screening tools for developmental, behavioral and social delays that meet the above criteria include, but are not limited to:

- Ages and Stages Questionnaire (ASQ) - 2 months to 5 years
- Ages and Stages Questionnaire - 3rd Edition (ASQ-3)
- Battelle Developmental Inventory Screening Tool (BDI-ST) – Birth to 95 months
- Bayley Infant Neuro-developmental Screen (BINS) - 3 months to 2 years
- Brigance Screens-II – Birth to 90 months
- Child Development Inventory (CDI) - 18 months to 6 years
- Infant Development Inventory – Birth to 18 months
- Parents’ Evaluation of Developmental Status (PEDS) – Birth to 8 years
- Parent’s Evaluation of Developmental Status - Developmental Milestones (PEDS-DM)

The tools listed above are not specific recommendations for tools but are examples of tools cited in Bright Futures that have met the above criteria. Bright Futures cites the 2006 statement on Developmental Screening by the American Academy of Pediatrics. New and updated recommendations are anticipated and may include additional tools that meet these criteria. In addition, new tools meeting these criteria may be developed and may be included in future versions of Bright Futures.

**Numerator Options:**

**Performance Met:** Children who were screened for risk of developmental, behavioral and social delays using a standardized tool with interpretation and report (G9966)

**OR**

**Performance Not Met:** Children who were not screened for risk of developmental, behavioral and social delays using a standardized tool with interpretation and report (G9967)

**RATIONALE:**

Developmental surveillance should be a component of every preventive care visit. Standardized developmental screening tools should be used when such surveillance identifies concerns about a child’s development. Furthermore, it is recommended that standardized screening for developmental, behavioral and social delays occur at the 9-, 18-, and 24-month OR 30-month well visits.

When a child has a positive screening result for a developmental problem, developmental and medical evaluations to identify the specific developmental disorders and related medical problems are warranted. Children diagnosed with developmental disorders should be identified as children with special health care needs; chronic-condition management for these children should be initiated.
**CLINICAL RECOMMENDATION STATEMENTS:**

**Bright Futures: Guidelines For Health Supervision of Infants, Children and Adolescent**

At 9, 18 and 30 Month Visits, health care providers should perform structured developmental screens. Referral should be made to an appropriate early intervention program or developmental specialist for evaluation. Grade: Consensus and Guideline-Based

**Council on Children with Disabilities**

Medical Professionals should use standardized developmental screening tools to screen children and 9 months, 18 months:

- Developmental and medical evaluations to identify the specific developmental disorders and related medical problems
- Referred to early developmental intervention and early childhood services and scheduled for earlier return visits to increase developmental surveillance.
- Identified as children with special health care needs; chronic-condition management for these children should be initiated.

Grade: Consensus and Guideline-Based

2018 Registry Flow for Quality ID #467 NQF 1448: Developmental Screening in the First Three Years of Life Submission Criteria One

Multiple Performance – Criteria 1

Start

Denominator

Patient Age at Date of Service ≤ 1 Year of Age

No

Encounter Codes as Listed in Denominator*
(1/1/2016 thru 12/31/2018)

No

Telehealth Modifier, GQ, OT, OT, POS 02

No

Include in Eligible Population/Denominator (100 patients)

d1

Yes

Children Who Were Screened for Risk of Developmental, Behavioral and Social Delays Using a Standardized Tool with Interpretation and Report

Yes

Data Completeness Met + Performance Met 099065 or equivalent (70 patients) a1

No

Children Who Were Not Screened for Risk of Developmental, Behavioral and Social Delays Using a Standardized Tool with Interpretation and Report

Yes

Data Completeness Met + Performance Not Met 099067 or equivalent (50 patients) c1

No

Not Included in Eligible Population/Denominator

Yes

Data Completeness Not Met Quality Data Code or equivalent not submitted (10 patients) d1

* See the posted Measure Specification for specific coding and instructions to submit this measure.
** It is anticipated for registry submission that for every performance rate, a data completeness will be submitted. CMS will determine or use the overall data completeness and performance rate.

2018 Registry Flow for Quality ID #467 NQF 1448: Developmental Screening in the First Three Years of Life

**Multiple Performances**

**SAMPLE CALCULATIONS: Data Completeness and Performance for Submission Criteria One**

Data Completeness:

Performance Met (≥ 270 patients) - Performance Not Met (c ≤ 20 patients)

\[ \frac{270 - 20}{270} = \frac{250}{270} = 93\% \]

Performance Rate:

Performance Met (≥ 270 patients) = 270 patients

Data Completeness Numerator (90 patients) = 90 patients

**SAMPLE CALCULATIONS: Data Completeness and Performance for Submission Criteria Two**

Data Completeness:

Performance Met (≥ 70 patients) - Performance Not Met (c ≤ 23 patients)

\[ \frac{70 - 23}{70} = \frac{47}{70} = 77.77\% \]

Performance Rate:

Performance Met (≥ 70 patients) = 70 patients

Data Completeness Numerator (50 patients) = 50 patients

**SAMPLE CALCULATIONS: Data Completeness and Performance for Submission Criteria Three**

Data Completeness:

Performance Met (≥ 70 patients) - Performance Not Met (c ≤ 26 patients)

\[ \frac{70 - 26}{70} = \frac{44}{70} = 77.77\% \]

Performance Rate:

Performance Met (≥ 70 patients) = 70 patients

Data Completeness Numerator (90 patients) = 90 patients

**SAMPLE CALCULATIONS: Data Completeness and Performance Rate for Total Performance Rate**

Data Completeness:

Performance Met (≥ 90 patients) - Performance Not Met (c ≤ 210 patients)

\[ \frac{210 - 210}{210} = \frac{0}{210} = 0\% \]

Performance Rate:

Performance Met (≥ 90 patients) = 210 patients

Data Completeness Numerator (270 patients) = 270 patients

---

* See the posted Measure Specification for specific coding and instructions to submit this measure.

NOTE: Submission Frequency Visit.

**It is anticipated for registry submission that for every performance rate, a data completeness will be submitted. CMS will determine or use the overall data completeness and performance rate.**
Submission Criteria One:

1. Start with Denominator

2. Check Patient Age:
   a. If the Age is less than or equal to 1 year of age at Date of Service and equals No during the performance period, do not include in Eligible Patient Population. Stop Processing.
   b. If the Age is less than or equal to 1 year of age at Date of Service and equals Yes during the performance period, proceed to check Encounter Performed.

3. Encounter Performed
   a. If Encounter as listed in the denominator equals No, do not include in Eligible Patient Population. Stop Processing.
   b. If Encounter as listed in the denominator equals Yes, proceed to check Telehealth Modifier.

4. Check Telehealth Modifier:
   a. If Telehealth Modifier equals Yes, do not include in Eligible Patient Population. Stop Processing.
   b. If Telehealth Modifier equals No, include in the Eligible Population.

5. Denominator Population:
   a. Denominator population is all Eligible Patients in the denominator. Denominator is represented as Denominator in the Sample Calculation listed at the end of this document. Letter d1 equals 100 patients in the Sample Calculation.

6. Start Numerator

7. Check Children Who Were Screened For Risk Of Developmental, Behavioral And Social Delays Using A Standardized Tool With Interpretation And Report.
   a. If Children Who Were Screened For Risk Of Developmental, Behavioral And Social Delays Using A Standardized Tool With Interpretation And Report equals Yes, include in Data Completeness Met and Performance Met.
   b. Data Completeness Met and Performance Met letter is represented in the Data Completeness and Performance Rate in the sample calculation listed at the end of this document. Letter a1 equals 70 patients in the Sample Calculation.
   c. If Children Who Were Screened For Risk Of Developmental, Behavioral And Social Delays Using A Standardized Tool With Interpretation And Report equals No, proceed to Children Who Were Not
Screened For Risk Of Developmental, Behavioral And Social Delays Using A Standardized Tool With Interpretation And Report.

   
a. If Children Who Were Not Screened For Risk Of Developmental, Behavioral And Social Delays Using A Standardized Tool With Interpretation And Report equals Yes, include in Data Completeness Met and Performance Not Met.

b. Data Completeness Met and Performance Not Met letter is represented in the Data Completeness and Performance Rate in the sample calculation listed at the end of this document. Letter c1 equals 20 patients in the Sample Calculation.

c. If Children Who Were Screened For Risk Of Developmental, Behavioral And Social Delays Using A Standardized Tool With Interpretation And Report equals No, proceed to Data Completeness Not Met.

9. Check Data Completeness Not Met:
   
a. If Data Completeness Not Met equals No, Quality Data Code or equivalent not submitted. 10 patients have been subtracted from the Data Completeness Numerator in the Sample Calculation.

### SAMPLE CALCULATIONS: Data Completeness and Performance for Submission Criteria One

<table>
<thead>
<tr>
<th>Data Completeness Met</th>
<th>Performance Met ((a = 70) patients) + Performance Not Met ((c = 20) patients) = 90 patients</th>
<th>90%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Eligible Population / Denominator ((d = 100) patients) = 100 patients</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Performance Rate:

<table>
<thead>
<tr>
<th>Performance Met ((a = 70) patients) = 70 patients</th>
<th>77.77%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Data Completeness Numerator (90 patients) = 90 patients</td>
<td></td>
</tr>
</tbody>
</table>
Submission Criteria Two:
10. Start with Denominator

11. Check Patient Age:
   a. If the Age is greater than 1 year of age or equal to 2 year of age at Date of Service and equals No during the performance period, do not include in Eligible Patient Population. Stop Processing.
   b. If the Age is greater than 1 year of age or equal to 2 year of age at Date of Service and equals Yes during the performance period, proceed to check Encounter Performed.

12. Encounter Performed
   a. If Encounter as listed in the denominator equals No, do not include in Eligible Patient Population. Stop Processing.
   b. If Encounter as listed in the denominator equals Yes, proceed to check Telehealth Modifier.

13. Check Telehealth Modifier:
   a. If Telehealth Modifier equals Yes, do not include in Eligible Patient Population. Stop Processing.
   b. If Telehealth Modifier equals No, include in the Eligible Population.

14. Denominator Population:
   a. Denominator population is all Eligible Patients in the denominator. Denominator is represented as Denominator in the Sample Calculation listed at the end of this document. Letter d2 equals 100 patients in the Sample Calculation.

15. Start Numerator

   a. If Children Who Were Screened For Risk Of Developmental, Behavioral And Social Delays Using A Standardized Tool With Interpretation And Report equals Yes, include in Data Completeness Met and Performance Met.
   b. Data Completeness Met and Performance Met letter is represented in the Data Completeness and Performance Rate in the sample calculation listed at the end of this document. Letter a2 equals 70 patients in the Sample Calculation.
   c. If Children Who Were Screened For Risk Of Developmental, Behavioral And Social Delays Using A Standardized Tool With Interpretation And Report equals No, proceed to Children Who Were Not Screened For Risk Of Developmental, Behavioral And Social Delays Using A Standardized Tool With Interpretation And Report.
17. Check Children Who Were Not Screened For Risk Of Developmental, Behavioral And Social Delays Using A Standardized Tool With Interpretation And Report.

a. If Children Who Were Not Screened For Risk Of Developmental, Behavioral And Social Delays Using A Standardized Tool With Interpretation And Report equals Yes, include in Data Completeness Met and Performance Not Met.

b. Data Completeness Met and Performance Not Met letter is represented in the Data Completeness and Performance Rate in the sample calculation listed at the end of this document. Letter c2 equals 20 patients in the Sample Calculation.

c. If Children Who Were Not Screened For Risk Of Developmental, Behavioral And Social Delays Using A Standardized Tool With Interpretation And Report equals No, proceed to Data Completeness Not Met.

18. Check Data Completeness Not Met:

a. If Data Completeness Not Met equals No, Quality Data Code or equivalent not submitted. 10 patients have been subtracted from the Data Completeness Numerator in the Sample Calculation.

### SAMPLE CALCULATIONS: Data Completeness and Performance for Submission Criteria Two

<table>
<thead>
<tr>
<th>Data Completeness-</th>
<th>Performance Met (a=70 patients) + Performance Not Met (c²=20 patients) = 90 patients = 90%</th>
</tr>
</thead>
<tbody>
<tr>

</table>
2018 Registry Flow For Quality ID #467 (NQF 1448):
Developmental Screening in the First Three Years of Life
Multiple Performances – Submission Criteria Three

Please refer to the specific section of the specification to identify the denominator and numerator information for use in submitting this Individual Specification. This flow is for registry data submission.

Submission Criteria Three:

19. Start with Denominator

20. Check Patient Age:
   a. If the Age is greater than 2 years of age or equal to 3 years of age at Date of Service and equals No during the performance period, do not include in Eligible Patient Population. Stop Processing.
   b. If the Age is greater than 2 years of age or equal to 3 years of age at Date of Service and equals Yes during the performance period, proceed to check Encounter Performed.

21. Encounter Performed
   a. If Encounter as listed in the denominator equals No, do not include in Eligible Patient Population. Stop Processing.
   b. If Encounter as listed in the denominator equals Yes, proceed to check Telehealth Modifier.

22. Check Telehealth Modifier:
   a. If Telehealth Modifier equals Yes, do not include in Eligible Patient Population. Stop Processing.
   b. If Telehealth Modifier equals No, include in the Eligible Population.

23. Denominator Population:
   a. Denominator population is all Eligible Patients in the denominator. Denominator is represented as Denominator in the Sample Calculation listed at the end of this document. Letter d3 equals 100 patients in the Sample Calculation.

24. Start Numerator

25. Check Children Who Were Screened For Risk Of Developmental, Behavioral And Social Delays Using A Standardized Tool With Interpretation And Report.
   a. If Children Who Were Screened For Risk Of Developmental, Behavioral And Social Delays Using A Standardized Tool With Interpretation And Report equals Yes, include in Data Completeness Met and Performance Met.
   b. Data Completeness Met and Performance Met letter is represented in the Data Completeness and Performance Rate in the sample calculation listed at the end of this document. Letter a3 equals 70 patients in the Sample Calculation.
   c. If Children Who Were Screened For Risk Of Developmental, Behavioral And Social Delays Using A Standardized Tool With Interpretation And Report equals No, proceed to Children Who Were Not

   a. If Children Who Were Not Screened For Risk Of Developmental, Behavioral And Social Delays Using A Standardized Tool With Interpretation And Report equals Yes, include in Data Completeness Met and Performance Not Met.

   b. Data Completeness Met and Performance Not Met letter is represented in the Data Completeness and Performance Rate in the sample calculation listed at the end of this document. Letter c3 equals 20 patients in the Sample Calculation.

   c. If Children Who Were Not Screened For Risk Of Developmental, Behavioral And Social Delays Using A Standardized Tool With Interpretation And Report equals No, proceed to Data Completeness Not Met.

27. Check Data Completeness Not Met:

   a. If Data Completeness Not Met equals No, Quality Data Code or equivalent not submitted. 10 patients have been subtracted from the Data Completeness Numerator in the Sample Calculation.

---

**SAMPLE CALCULATIONS: Data Completeness and Performance for Submission Criteria Three**

<table>
