Measure #48: Urinary Incontinence: Assessment of Presence or Absence of Urinary Incontinence in Women Aged 65 Years and Older – National Quality Strategy Domain: Effective Clinical Care

2017 OPTIONS FOR INDIVIDUAL MEASURES:
REGISTRY ONLY

MEASURE TYPE:
Process

DESCRIPTION:
Percentage of female patients aged 65 years and older who were assessed for the presence or absence of urinary incontinence within 12 months

INSTRUCTIONS:
This measure is to be reported a minimum of once per performance period for patients seen during the performance period. This measure is appropriate for use in the ambulatory setting only and is considered a general screening measure. There is no diagnosis associated with this measure. This measure may be reported by eligible clinicians who perform the quality actions described in the measure based on the services provided and the measure-specific denominator coding.

Measure Reporting:
The listed denominator criteria is used to identify the intended patient population. The numerator options included in this specification are used to submit the quality actions allowed by the measure. The quality-data codes listed do not need to be submitted for registry-based submissions; however, these codes may be submitted for those registries that utilize claims data.

DENOMINATOR:
All female patients aged 65 years and older with a visit during the measurement period

Denominator Criteria (Eligible Cases):
All female patients aged ≥ 65 years on date of encounter
AND
Patient encounter during the performance period (CPT or HCPCS): 99201, 99202, 99203, 99204, 99205, 99212, 99213, 99214, 99215, 99324, 99325, 99326, 99327, 99328, 99334, 99335, 99336, 99337, 99341, 99342, 99343, 99344, 99345, 99346, 99347, 99348, 99349, 99350, G0402
AND NOT
DENOMINATOR EXCLUSION:
Patient use of hospice services any time during the measurement period: G9693

NUMERATOR:
Patients who were assessed for the presence or absence of urinary incontinence within 12 months

Definition:
Urinary Incontinence – Any involuntary leakage of urine

Numerator Options:
Performance Met: Presence or absence of urinary incontinence assessed (1090F)
OR
Performance Not Met: Presence or absence of urinary incontinence not assessed, reason not otherwise specified (1090F with 8P)
RATIONALE:
Female patients may not volunteer information regarding incontinence so they should be asked by their physician.

CLINICAL RECOMMENDATION STATEMENTS:
Strategies to increase recognition and reporting of UI are required and especially the perception that it is an inevitable consequence of aging for which little or nothing can be done. (ICI)

Patients with urinary incontinence should undergo a basic evaluation that includes a history, physical examination, measurement of post-void residual volume, and urinalysis. (ACOG) (Level C)

Health care providers should be able to initiate evaluation and treatment of UI basing their judgment on the results of history, physical examination, post-voiding residual and urinalysis. (ICI) (Grade

2017 Registry Individual Measure Flow

#48: Urinary Incontinence: Assessment of Presence or Absence of Urinary Incontinence in Women Aged 65 Years and Older

Start

- Denominator
  - Female Patient Age at Date of Service ≥ 65 Years
    - Yes
      - Encounter as Listed in Denominator* (1/1/2017 thru 12/31/2017)
        - Yes
          - Presence or Absence of Urinary Incontinence Assessed
            - Yes
              - Data Completeness Met + Performance Met 1090F or equivalent (4 patients) a
            - No
              - Denominator Exclusion
                - Yes
                  - Patient Use of Hospice Services Any Time During the Measurement Period G9693 or equivalent
                    - Yes
                      - Include in Eligible Population/Denominator (8 patients) d
                    - No
                      - Not Included in Eligible Population/Denominator
                        - Yes
                          - Data Completeness Not Met Quality-Data Code or equivalent not reported (1 patient)
                        - No
                          - Not Included in Eligible Population/Denominator
                            - Yes
                              - Data Completeness Met + Performance Not Met 1090F-8P or equivalent (3 patients) c

SAMPLE CALCULATIONS:

Data Completeness:
Performance Met (a=4 patients) + Performance Not Met (c=3 patients) = 7 patients = 87.50%
Eligible Population / Denominator (d=8 patients) = 8 patients

Performance Rate:
Performance Met (a=4 patients) = 4 patients = 57.14%
Data Completeness Numerator (7 patients) = 7 patients

*See the posted Measure Specification for specific coding and instructions to report this measure.

2017 Registry Individual Measure Flow

#48: Urinary Incontinence: Assessment of Presence or Absence of Urinary Incontinence in Women Aged 65 years or older

Please refer to the specific section of the Measure Specification to identify the denominator and numerator information for use in reporting this Individual Measure.

1. Start with Denominator

2. Check Female Patient Age:
   a. If the Female Age is greater than or equal to 65 years of age on Date of Service and equals No during the measurement period, do not include in Eligible Patient Population. Stop Processing.
   b. If the Female Age is greater than or equal to 65 years of age on Date of Service and equals Yes during the measurement period, proceed to check Encounter Performed.

3. Check Encounter Performed:
   a. If Encounter as Listed in the Denominator equals No, do not include in Eligible Patient Population. Stop Processing.
   b. If Encounter as Listed in the Denominator equals Yes, proceed to check Patient Use of Hospice Services Any Time During the Measurement Period.

4. Check Patient Use of Hospice Services Any Time During the Measurement Period:
   a. If Patient Use of Hospice Services Any Time During the Measurement Period equals No, include in the Eligible population.
   b. If Patient Use of Hospice Services Any Time During the Measurement Period equals Yes, do not include in Eligible Patient Population. Stop Processing.

5. Denominator Population:
   a. Denominator population is all Eligible Patients in the denominator. Denominator is represented as Denominator in the Sample Calculation listed at the end of this document. Letter d equals 8 patients in the sample calculation.

6. Start Numerator

7. Check Presence or Absence of Urinary Incontinence Assessed:
   a. If Presence or Absence of Urinary Incontinence Assessed equals Yes, include in Data Completeness Met and Performance Met.
   b. Data Completeness Met and Performance Met letter is represented as Data Completeness and Performance Rate in the Sample Calculation listed at the end of this document. Letter a equals 4 patients in Sample Calculation.
   c. If Presence or Absence of Urinary Incontinence Assessed equals No, proceed to Presence or Absence of Urinary Incontinence Not Assessed, Reason Not Specified.

8. Check Presence or Absence of Urinary Incontinence Not Assessed, Reason Not specified:
a. If Presence or Absence of Urinary Incontinence Not Assessed, Reason Not Specified equals Yes, include in Data Completeness Met and Performance Not Met.

b. Data Completeness Met and Performance Not Met letter is represented as Data Completeness in the Sample Calculation listed at the end of this document. Letter c equals 3 patients in the Sample Calculation.

c. If Presence or Absence of Urinary Incontinence Not Assessed, Reason Not Specified equals No, proceed to Data Completeness Not Met.

9. Check Data Completeness Not Met:

a. If Data Completeness Not Met equals No, Quality Data Code or equivalent not reported. 1 patient has been subtracted from the Data Completeness numerator in sample calculation.

---

**SAMPLE CALCULATIONS:**

Data Completeness:

\[
\text{Performance Met (a=4 patients) + Performance Not Met (c=3 patients)} = 7 \text{ patients} = 87.50\% \\
\text{Eligible Population / Denominator (d=6 patients) = 8 patients}
\]

Performance Rate:

\[
\text{Performance Met (a=4 patients)} = 4 \text{ patients} = 57.14\% \\
\text{Data Completeness Numerator (7 patients) = 7 patients}
\]
