

**Quality ID #191 (NQF 0565): Cataracts: 20/40 or Better Visual Acuity within 90 Days Following Cataract Surgery**

– National Quality Strategy Domain: Effective Clinical Care

– Meaningful Measure Area: Management of Chronic Conditions

**2019 COLLECTION TYPE:**

**MIPS CLINICAL QUALITY MEASURES (CQMS)**

**MEASURE TYPE:**

Outcome – High Priority

**DESCRIPTION:**

Percentage of patients aged 18 years and older with a diagnosis of uncomplicated cataract who had cataract surgery and no significant ocular conditions impacting the visual outcome of surgery and had best-corrected visual acuity of 20/40 or better (distance or near) achieved within 90 days following the cataract surgery

**INSTRUCTIONS:**

This measure is to be calculated **each time** a procedure for uncomplicated cataracts is performed during the performance period. This measure is intended to reflect the quality of services provided for the patients receiving uncomplicated cataract surgery. This measure is to be submitted by the Merit-based Incentive Payment System (MIPS) eligible clinician performing the cataract surgery procedure. Clinicians who provide only preoperative or postoperative management of cataract patients are not eligible for this measure.

**Note: This is an outcome measure and can be calculated solely using third party intermediary data.**

- *For patients who receive the cataract surgical procedures specified in the denominator coding, it should be reported whether or not the patient had best-corrected visual acuity of 20/40 or better achieved within 90 days following cataract surgery.*
- *Patients who have any of the listed significant ocular conditions [comorbid] in the exclusion criteria should be removed from the denominator; these patients have existing ocular conditions that could impact the outcome of surgery and are not included in the measure calculation for those patients who have best-corrected visual acuity of 20/40 or better (distance or near) achieved within 90 days following the cataract surgery.*
- *Include only procedures performed through **September 30th** of the performance period. This will allow the post-operative period to occur within the performance period.*

**Measure Reporting Type:**

Measure data may be submitted by individual MIPS eligible clinicians, groups, or third party intermediaries. The listed denominator criteria are used to identify the intended patient population. The numerator options included in this specification are used to submit the quality actions as allowed by the measure. The quality-data codes listed do not need to be submitted by MIPS eligible clinicians, groups, or third party intermediaries that utilize this modality for submissions; however, these codes may be submitted for those third party intermediaries that utilize Medicare Part B claims data. For more information regarding Application Programming Interface (API), please refer to the Quality Payment Program (QPP) website.

**DENOMINATOR:**

All patients aged 18 years and older who had cataract surgery and no significant ocular conditions impacting the visual outcome of surgery

**Denominator Criteria (Eligible Cases):**

Patients aged  $\geq$  18 years on date of encounter

**AND**

**Patient encounter during the performance period (CPT):** 66840, 66850, 66852, 66920, 66930, 66940, 66982, 66983, 66984

**WITHOUT**

**Modifier:** 56 or 55

**AND NOT**

**DENOMINATOR EXCLUSION:**

**Any of the following significant ocular conditions that impact the visual outcome of surgery**

*(Patients with documentation of the presence of one or more of the following significant ocular conditions that impact the visual outcome of surgery prior to date of cataract surgery which is still active at the time of the cataract surgery are excluded from the measure calculation)*

**NUMERATOR:**

Patients who had best-corrected visual acuity of 20/40 or better (distance or near) achieved within 90 days following cataract surgery

**Numerator Options:**

**Performance Met:**

Best-corrected visual acuity of 20/40 or better (distance or near) achieved within the 90 days following cataract surgery **(4175F)**

**OR**

**Performance Not Met:**

Best-corrected visual acuity of 20/40 or better (distance or near) not achieved within the 90 days following cataract surgery, reason not otherwise specified (**4175F with 8P**)

**RATIONALE:**

In the United States, cataracts affect more than 24 million adults over 40 years. (NEI, 2016) According to the American Academy of Ophthalmology (AAO), cataract surgery has a substantial beneficial impact on visual function and on quality of life. (AAO, 2016)

1. Scientific basis for measuring visual acuity outcomes after cataract surgery

The only reason to perform cataract surgery (other than for a limited set of medical indications) is to improve a patient's vision and associated functioning. The use of a 20/40 visual acuity threshold is based on several considerations. First, it is the level for unrestricted operation of a motor vehicle in the US. Second, it has been consistently used by the FDA in its assessment for approval of intraocular lens (IOL) and other vision devices. Third, it is the literature standard to denote success in cataract surgery. Fourth, work by West et al in the Salisbury Eye Study suggests that 20/40 is a useful threshold for 50th percentile functioning for several vision-related tasks.

Most patients achieve excellent visual acuity after cataract surgery (20/40 or better). This outcome is achieved consistently through careful attention through the accurate measurement of axial length and corneal power and the appropriate selection of an IOL power calculation formula. As such, it reflects the care and diligence with which the surgery is assessed, planned and executed. Failure to achieve this after surgery in eyes without comorbid ocular conditions that would impact the success of the surgery would reflect care that should be assessed for opportunities for improvement.

The exclusion of patients with other ocular and systemic conditions known to increase the risk of an adverse outcome reflects the findings of the two published prediction rule papers for cataract surgery outcomes, by Mangione et al and Steinberg et al. In both papers, the presence of comorbid glaucoma and macular degeneration negatively impacted the likelihood of successful outcomes of surgery. Further, as noted in the prior indicator, exclusion of eyes with ocular conditions that could impact the success of the surgery would NOT eliminate the large majority of eyes undergoing surgery while also minimizing the potential adverse selection that might otherwise occur relative to those patients with the most complex situations who might benefit the most from having surgery to maximize their remaining vision.

2. Evidence of a gap in care

Cataract surgery successfully restores vision in the majority of people who have the procedure.

Data from a study of 368,256 cataract surgeries show that corrected visual acuity (CDVA) of 0.5 (20/40) or better was achieved in 94.3% and CDVA of 1.0 (20/20) or better was achieved in 61.3% of cases. (Lundstrom, 2013)

Additionally, data from a UK multi-center Cataract National Dataset found a postoperative visual acuity of 6/12 (20/40) or better was achieved for 94.7% of eyes with no co-pathologies and in 79.9% of eyes with one or more co-pathologies. (Jaycock, 2009)

A rate of 85.5-94.7% of patients achieving a 20/40 or better visual acuity in the context of approximately 3 million cataract surgeries in the US annually would mean that between 160,000 to 435,000 individuals would not achieve a 20/40 or better visual acuity which suggests an opportunity for improvement.

**2019 Clinical Quality Measure Flow for Quality ID #191 NQF #0565:  
Cataracts: 20/40 or Better Visual Acuity within 90 Days Following Cataract Surgery**

**SAMPLE CALCULATIONS:**

**Data Completeness=**  

$$\frac{\text{Performance Met (a=50 procedures)} + \text{Performance Not Met (c=20 procedures)}}{\text{Eligible Population / Denominator (d=80 procedures)}} = \frac{70 \text{ procedures}}{80 \text{ procedures}} = 87.50\%$$

**Performance Rate=**  

$$\frac{\text{Performance Met (a=50 procedures)}}{\text{Data Completeness Numerator (70 procedures)}} = \frac{50 \text{ procedures}}{70 \text{ procedures}} = 71.43\%$$

\*See the posted Measure Specification for specific coding and instructions to submit this measure.

\*\*Include only procedures performed between 1/1/2019 and 9/30/2019 to account for the 90 day period for the numerator action to be assessed after the procedure was performed.

**2019 Clinical Quality Measure Flow Narrative for Quality ID #191 NQF #0565:  
Cataracts: 20/40 or Better Visual Acuity within 90 Days Following Cataract Surgery**

Please refer to the specific section of the specification to identify the denominator and numerator information for use in submitting this Individual Specification.

1. Start with Denominator
2. Check Patient Age:
  - a. If Patient Age is greater than or equal to 18 Years on Date of Encounter equals No during the measurement period, do not include in Eligible Population. Stop Processing.
  - b. If Patient Age is greater than or equal to 18 Years on Date of Encounter equals Yes during the measurement period, proceed to check Encounter Performed.
3. Check Encounter Performed:
  - a. If Encounter as Listed in the Denominator equals No, do not include in Eligible Population. Stop Processing.
  - b. If Encounter as Listed in the Denominator equals Yes, proceed to check Modifier: 56 or 55.
4. Check Modifier: 56 or 55:
  - a. If Modifier: 56 or 55 equals Yes, do not include in Eligible Population. Stop Processing.
  - b. If Modifier: 56 or 55 equals No, proceed to check Patient Diagnosis.
5. Check Patient Diagnosis:
  - a. If Diagnosis of Significant Ocular Condition as Listed in the Denominator equals Yes, do not include in Eligible Population. Stop Processing.
  - b. If Diagnosis of Significant Ocular Condition as Listed in the Denominator equals No, include in Eligible Population.
6. Denominator Population:
  - a. Denominator Population is all Eligible Procedures in the Denominator. The Denominator is represented as Denominator in the Sample Calculation listed at the end of this document. Letter d equals 80 procedures in the Sample Calculation.
7. Start Numerator
8. Check Best-Corrected Visual Acuity of 20/40 or Better (Distance or Near) Achieved Within the 90 Days Following Cataract Surgery:
  - a. If Best-Corrected Visual Acuity of 20/40 or Better (Distance or Near) Achieved Within the 90 Days Following Cataract Surgery equals Yes, include in Data Completeness Met and Performance Met.

- b. Data Completeness Met and Performance Met letter is represented in the Data Completeness and Performance Rate in the Sample Calculation listed at the end of this document. Letter a equals 50 procedures in the Sample Calculation.
  - c. If Best-Corrected Visual Acuity of 20/40 or Better (Distance or Near) Achieved Within the 90 Days Following Cataract Surgery equals No, proceed to check Best-Corrected Visual Acuity of 20/40 or Better (Distance or Near) Not Achieved Within the 90 Days Following Cataract Surgery, Reason Not Otherwise Specified.
9. Check Best-Corrected Visual Acuity of 20/40 or Better (Distance or Near) Not Achieved Within the 90 Days Following Cataract Surgery, Reason Not Otherwise Specified:
- a. If Best-Corrected Visual Acuity of 20/40 or Better (Distance or Near) Not Achieved Within the 90 Days Following Cataract Surgery, Reason Not Otherwise Specified equals Yes, include in Data Completeness Met and Performance Not Met.
  - b. Data Completeness Met and Performance Not Met letter is represented in the Data Completeness in the Sample Calculation listed at the end of this document. Letter c equals 20 procedures in the Sample Calculation.
  - c. If Best-Corrected Visual Acuity of 20/40 or Better (Distance or Near) Not Achieved Within the 90 Days Following Cataract Surgery, Reason Not Otherwise Specified equals No, proceed to check Data Completeness Not Met.
10. Check Data Completeness Not Met:
- a. If Data Completeness Not Met, the Quality Data Code or equivalent was not submitted. 10 procedures have been subtracted from the Data Completeness Numerator in the Sample Calculation.

**SAMPLE CALCULATIONS:**

**Data Completeness=**

$$\frac{\text{Performance Met (a=50 procedures)} + \text{Performance Not Met (c=20 procedures)}}{\text{Eligible Population / Denominator (d=80 procedures)}} = \frac{70 \text{ procedures}}{80 \text{ procedures}} = 87.50\%$$

**Performance Rate=**

$$\frac{\text{Performance Met (a=50 procedures)}}{\text{Data Completeness Numerator (70 procedures)}} = \frac{50 \text{ procedures}}{70 \text{ procedures}} = 71.43\%$$
