Quality ID #396: Lung Cancer Reporting (Resection Specimens)
– National Quality Strategy Domain: Communication and Care Coordination
– Meaningful Measure Area: Transfer of Health Information and Interoperability

2019 COLLECTION TYPE:
MIPS CLINICAL QUALITY MEASURES (CQMS)

MEASURE TYPE:
Process – High Priority

DESCRIPTION:
Pathology reports based on resection specimens with a diagnosis of primary lung carcinoma that include the pT category, pN category and for non-small cell lung cancer, histologic type

INSTRUCTIONS:
This measure is to be submitted each time a patient’s pathology report addresses specimens with a diagnosis of non-small cell lung cancer; however, only one quality-data code (QDC) per date of service for a patient is required. This measure may be submitted by Merit-based Incentive Payment System (MIPS) eligible clinicians who perform the quality actions described in the measure based on the services provided and the measure-specific denominator coding.

Measure Submission Type:
Measure data may be submitted by individual MIPS eligible clinicians, groups, or third party intermediaries. The listed denominator criteria are used to identify the intended patient population. The numerator options included in this specification are used to submit the quality actions as allowed by the measure. The quality-data codes listed do not need to be submitted by MIPS eligible clinicians, groups, or third party intermediaries that utilize this modality for submissions; however, these codes may be submitted for those third party intermediaries that utilize Medicare Part B claims data. For more information regarding Application Programming Interface (API), please refer to the Quality Payment Program (QPP) website.

DENOMINATOR:
Pathology reports for resection specimens for primary lung carcinoma

**Denominator Criteria (Eligible Cases):**
Patients ≥18 years of age on date of encounter
AND
Diagnosis for lung cancer (ICD-10-CM): C34.00, C34.01, C34.02, C34.10, C34.11, C34.12, C34.2, C34.30, C34.31, C34.32, C34.80, C34.81, C34.82, C34.90, C34.91, C34.92
AND
Patient procedure during performance period (CPT): 88309
AND NOT
**DENOMINATOR EXCLUSION:**
Specimen site other than anatomic location of lung, OR classified as NSCLC-NOS: G9424

NUMERATOR:
Pathology reports based on resection specimens with a diagnosis of primary lung carcinoma that include the pT category, pN category and for non-small cell lung cancer, histologic type (squamous cell carcinoma, adenocarcinoma and NOT NSCLC-NOS)

**Numerator Options:**
**Performance Met:** Primary lung carcinoma resection report documents pT category, pN category and for Non-small Cell
Lung Cancer, Histologic Type (Squamous Cell Carcinoma, Adenocarcinoma and NOT NSCLC-NOS) (G9422)

**OR**

**Denominator Exception:**
Documentation of medical reason for not including pT category, pN category and histologic type [For patient with appropriate exclusion criteria (e.g. metastatic disease, benign tumors, malignant tumors other than carcinomas, inadequate surgical specimens)] (G9423)

**OR**

**Performance Not Met:**
Primary lung carcinoma resection report does not document pT category, pN category and for Non-small Cell Lung Cancer, Histologic Type (Squamous Cell Carcinoma, Adenocarcinoma) (G9425)

**RATIONALE:**
The TNM staging revisions (AJCC 7th edition) became effective for all new cases diagnosed after January 1, 2010. The new staging system is applicable to both NSCLC and, for the first time, SCLC. There are significant changes in staging, particularly in T3 for NSCLC. For these reasons, we believe a gap exists in the appropriate and consistent use of the new pT standards for lung cancer. (CAP Performance Measures Working Group)

**CLINICAL RECOMMENDATION STATEMENTS:**
The TNM staging system of the American Joint Committee on Cancer (AJCC) and the International Union Against Cancer (UICC) is recommended for non-small cell lung cancer. Small cell lung cancer has been more commonly classified according to a separate staging system as either “limited” or “extensive” disease, but based on analysis of the International Association for the Study of Lung Cancer (IASLC) database, TNM staging is also recommended for small cell lung cancer.

The purpose of pathologic evaluation is to precisely classify the histologic type of lung cancer and to determine all staging parameters as recommended by the AJCC including tumor size, the extent of invasion (pleural and bronchial), adequacy of surgical margins, and presence or absence of lymph node metastasis.

Pathologic evaluation is performed to classify the histologic type of the lung cancer, determine the extent of invasion, determine whether it is primary lung cancer or metastatic cancer, establish the cancer involvement status of the surgical margins (i.e., positive or negative margins), and do molecular diagnostic studies to determine whether certain gene mutations are present.

A new lung cancer TMN staging system was developed by the International Association of the Study of Lung Cancer (IASLC) and adopted by the American Joint Commission for Cancer (AJCC) (7th edition, 2010). This new staging system is applicable to both NSCLC and SCLC based on studies by the IASLC which demonstrated the prognostic significance of the various stage designations in both diseases application of the TNM system will not change how patients are treated; however, clinical research studies should begin to utilize the TNM system, because it will allow for more precise assessments of prognosis and specific therapy in the future. Therefore, the SCLC algorithm was revised in 2011 to include the TNM staging information.

**CAP June 2017 Protocol for the Examination of Specimens From Patients With Primary Non-Small Cell Carcinoma, Small Cell Carcinoma, or Carcinoid Tumor of the Lung**

**The NCCN. Non-Small Cell Lung Cancer: Clinical Practice Guidelines in Oncology.** Updated April 11, 2012. Accessed May 9, 2012. To view the most recent and complete version of the guideline, go online to National Comprehensive Cancer Network.

2019 Clinical Quality Measure Flow for Quality ID #396: Lung Cancer Reporting (Resection Specimens)

Start

Denominator

Patient ≥ 18 Years of Age on Date of Encounter

No

Yes

Diagnosis for Lung Cancer as Listed in the Denominator

No

Yes

Procedure as Listed in the Denominator (1/1/2019 thru 12/31/2019)

No

Yes

Primary Lung Carcinoma Resection Report Documents PT Category, pH Category and for Non-small Cell Lung Cancer, Histologic Type: Squamous Cell Carcinoma, Adenocarcinoma and Not NSCLC-NOS

No

Yes

Data Completeness Met + Performance Met G9422 or equivalent (40 procedures)

Data Completeness Met + Denominator Exception G9423 or equivalent (10 procedures)

Data Completeness Met + Performance Not Met G9425 or equivalent (20 procedures)

Data Completeness Not Met - the Quality Data Code or equivalent was not submitted (10 procedures)

Numerator

SAMPLE CALCULATIONS:

Data Completeness -
Performance Met (≥10 procedures) + Denominator Exception (≥10 procedures) + Performance Not Met (≥20 procedures) = 70 procedures = 87.50%
Eligible Population / Denominator (≥50 procedures) = 90 procedures

Performance Rate -
Performance Met (≥40 procedures) = 40 procedures = 66.67%
Data Completeness Numerator (70 procedures) - Denominator Exception (≥10 procedures) = 60 procedures

*See the posted Measure Specification for specific coding and instructions to submit this measure.
**NOTE: Submission Frequency: Procedure
2019 Clinical Quality Measure Flow Narrative for Quality ID #396: Lung Cancer Reporting (Resection Specimens)

Please refer to the specific section of the specification to identify the denominator and numerator information for use in submitting this Individual Specifications.

1. Start with Denominator

2. Check Patient Age:
   a. If Patient Age at Date of Service is greater than or equal to 18 Years equals No, do not include in Eligible Population. Stop Processing.
   b. If Patient Age at Date of Service is greater than or equal to 18 Years equals Yes, proceed to check Patient Diagnosis.

3. Check Patient Diagnosis:
   a. If Diagnosis for Lung Cancer as Listed in the Denominator equals No, do not include in Eligible Population. Stop Processing.
   b. If Diagnosis for Lung Cancer as Listed in the Denominator equals Yes, proceed to check Procedure Performed.

4. Check Procedure Performed:
   a. If Procedure as Listed in the Denominator equals No, do not include in Eligible Population. Stop Processing.
   b. If Procedure as Listed in the Denominator equals Yes, proceed to check Specimen Site Other Than Anatomic Location of Lung, OR Classified as NSCLC-NOS:

5. Check Specimen Site Other Than Anatomic Location of Lung, OR Classified as NSCLC-NOS.
   a. If Specimen Site Other Than Anatomic Location of Lung, OR Classified as NSCLC-NOS equals Yes, do not include in Eligible Population. Stop Processing.
   b. If Specimen Site Other Than Anatomic Location of Lung, OR Classified as NSCLC-NOS equals No, include in Eligible Population.

6. Denominator Population:
   a. Denominator Population is all Eligible Procedures in the Denominator. Denominator is represented as Denominator in the Sample Calculation listed at the end of this document. Letter d equals 80 procedures in the Sample Calculation.

7. Start Numerator

8. Check Primary Lung Carcinoma Resection Report Documents pT Category, pN Category and for Non-small Cell Lung Cancer, Histologic Type (Squamous Cell Carcinoma, Adenocarcinoma and NOT NSCLC-NOS):
   a. If Primary Lung Carcinoma Resection Report Documents pT Category, pN Category and for Non-small Cell Lung Cancer, Histologic Type (Squamous Cell Carcinoma, Adenocarcinoma and NOT NSCLC-
NOS) equals Yes, include in Data Completeness Met and Performance Met.

d. Data Completeness Met and Performance Met letter is represented in the Data Completeness and Performance Rate in the Sample Calculation listed at the end of this document. Letter a equals 40 procedures in Sample Calculation.

c. If Primary Lung Carcinoma Resection Report Documents pT Category, pN Category and for Non-small Cell Lung Cancer, Histologic Type (Squamous Cell Carcinoma, Adenocarcinoma and NOT NSCLC-NOS) equals No, proceed to check Documentation of Medical Reason for Not Including pT Category, pN Category and Histologic Type [For Patient with Appropriate Exclusion Criteria…].

9. Check Documentation of Medical Reason for Not Including pT Category, pN Category and Histologic Type [For Patient with Appropriate Exclusion Criteria…]:

a. If Documentation of Medical Reason for Not Including pT Category, pN Category and Histologic Type [For Patient with Appropriate Exclusion Criteria…] equals Yes, include in the Data Completeness Met and Denominator Exception.

b. Data Completeness Met and Denominator Exception letter is represented in the Data Completeness and Performance Rate in the Sample Calculation listed at the end of this document. Letter b equals 10 procedures in the Sample Calculation.

c. If Documentation of Medical Reason for Not Including pT Category, pN Category and Histologic Type [For patient with Appropriate Exclusion Criteria…] equals No, proceed to check Primary Lung Carcinoma Resection Report Does Not Document pT Category, pN Category and for Non-small Cell Lung Cancer, Histologic Type, (Squamous Cell Carcinoma, Adenocarcinoma).

10. Check Primary Lung Carcinoma Resection Report Does Not Document pT Category, pN Category and for Non-small Cell Lung Cancer, Histologic Type, (Squamous Cell Carcinoma, Adenocarcinoma):

a. If Primary Lung Carcinoma Resection Report Does Not Document pT Category, pN category and for Non-small Cell Lung Cancer, Histologic Type, (Squamous Cell Carcinoma, Adenocarcinoma) equals Yes, include in Data Completeness Met and Performance Not Met.

b. Data Completeness Met and Performance Not Met letter is represented in the Data Completeness in the Sample Calculation listed at the end of this document. Letter c equals 20 procedures in the Sample Calculation.

c. If Primary Lung Carcinoma Resection Report Does Not Document pT Category, pN Category and for Non-small Cell Lung Cancer, Histologic Type, (Squamous Cell Carcinoma, Adenocarcinoma) equals No, proceed to check Data Completeness Not Met.

11. Check Data Completeness Not Met:

a. If Data Completeness Not Met, the Quality Data Code or equivalent was not submitted. 10 procedures have been subtracted from the Data Completeness Numerator in the Sample Calculation.

---

**SAMPLE CALCULATIONS:**

<table>
<thead>
<tr>
<th>Data Completeness</th>
<th>Performance Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Performance Met (n=10 procedures)</td>
<td>Denominator Exception (n=20 procedures)</td>
</tr>
<tr>
<td>90 procedures</td>
<td>70 procedures</td>
</tr>
</tbody>
</table>

Eligible Population/Denominator (50-60 procedures) = 60 procedures

Data Completeness Numerator (70 procedures) - Denominator Exception (n=10 procedures) = 60 procedures

Performance Rate = Performance Met (n=10 procedures) / Eligible Population/Denominator (50-60 procedures) = 66.67%
