

Quality ID #180: Rheumatoid Arthritis (RA): Glucocorticoid Management

2026 COLLECTION TYPE:

MERIT-BASED INCENTIVE PAYMENT SYSTEM (MIPS) CLINICAL QUALITY MEASURE (CQM)

MEASURE TYPE:

Process

DESCRIPTION:

Percentage of patients aged 18 years and older with two or more encounters with a diagnosis of rheumatoid arthritis (RA) at least 90 days apart who have been assessed for glucocorticoid use and, for those on prolonged doses of prednisone >5 mg daily (or equivalent) with improvement or no change in disease activity, documentation of glucocorticoid management plan during the performance period.

INSTRUCTIONS:

Reporting Frequency:

This measure is to be submitted a minimum of once per performance period for denominator eligible cases as defined in the denominator criteria.

Intent and Clinical Applicability:

The intent of this measure is to reflect the quality of services provided for patients aged 18 and older with a diagnosis of RA on glucocorticoids. This measure may be submitted by Merit-based Incentive Payment System (MIPS) eligible clinicians who perform the quality actions as defined by the numerator based on the services provided and the measure-specific denominator coding.

Measure Strata and Performance Rates:

This measure contains one strata defined by a single submission criteria.

This measure produces a single performance rate.

Implementation Considerations:

For the purposes of MIPS implementation, this patient-process measure is submitted a minimum of once per patient for the performance period. The most advantageous quality data code will be used if the measure is submitted more than once.

Telehealth:

TELEHEALTH ELIGIBLE: This measure is appropriate for and applicable to the telehealth setting. Patient encounters conducted via telehealth using encounter code(s) found in the denominator encounter criteria are allowed for this measure. Therefore, if the patient meets all denominator criteria for a telehealth encounter, it would be appropriate to include them in the denominator eligible patient population. Telehealth eligibility is at the measure level for inclusion within the denominator eligible patient population and based on the measure specification definitions which are independent of changes to coding and/or billing practices.

Measure Submission:

The quality data codes listed do not need to be submitted by MIPS eligible clinicians, groups, or third party intermediaries that utilize this collection type for submissions; however, these codes may be submitted for those third party intermediaries that utilize Medicare Part B claims data. The coding provided to identify the measure criteria: Denominator or Numerator, may be an example of coding that could be used to identify patients that meet the intent of this clinical topic. When implementing this measure, please refer to the 'Reference Coding' section to determine if other codes or code languages that meet the intent of the criteria may also be used within the medical record to identify and/or assess patients. For more information regarding Application Programming Interface (API), please refer to the Quality Payment Program (QPP) website.

DENOMINATOR:

Patients aged 18 years and older with two or more RA diagnoses documented at least 90 days apart with at least one encounter with an RA diagnosis occurring during the performance period and an additional encounter with an RA diagnosis occurring in the performance period or prior performance period.

Definitions:

Encounter – An encounter during the performance period where one of the CPT or HCPCS codes listed in the patient encounter criteria is used.

Additional encounter – An additional encounter during the performance period or prior performance period where one of the CPT or HCPCS codes listed in the patient encounter is used to confirm an RA diagnosis with ICD-10-CM diagnosis codes as listed in the Denominator criteria.

DENOMINATOR NOTE:

**Signifies that this HCPCS code is a non-covered service under the Medicare Part B Physician Fee Schedule (PFS). These non-covered services should be counted in the denominator population for the MIPS CQMs.*

Denominator Criteria (Eligible Cases):

Patients aged \geq 18 years on date of encounter

AND

Diagnosis for rheumatoid arthritis(RA) (ICD-10-CM): M05.A, M05.00, M05.011, M05.012, M05.019, M05.021, M05.022, M05.029, M05.031, M05.032, M05.039, M05.041, M05.042, M05.049, M05.051, M05.052, M05.059, M05.061, M05.062, M05.069, M05.071, M05.072, M05.079, M05.09, M05.10, M05.111, M05.112, M05.119, M05.121, M05.122, M05.129, M05.131, M05.132, M05.139, M05.141, M05.142, M05.149, M05.151, M05.152, M05.159, M05.161, M05.162, M05.169, M05.171, M05.172, M05.179, M05.19, M05.20, M05.211, M05.212, M05.219, M05.221, M05.222, M05.229, M05.231, M05.232, M05.239, M05.241, M05.242, M05.249, M05.251, M05.252, M05.259, M05.261, M05.262, M05.269, M05.271, M05.272, M05.279, M05.29, M05.30, M05.311, M05.312, M05.319, M05.321, M05.322, M05.329, M05.331, M05.332, M05.339, M05.341, M05.342, M05.349, M05.351, M05.352, M05.359, M05.361, M05.362, M05.369, M05.371, M05.372, M05.379, M05.39, M05.40, M05.411, M05.412, M05.419, M05.421, M05.422, M05.429, M05.431, M05.432, M05.439, M05.441, M05.442, M05.449, M05.451, M05.452, M05.459, M05.461, M05.462, M05.469, M05.471, M05.472, M05.479, M05.49, M05.50, M05.511, M05.512, M05.519, M05.521, M05.522, M05.529, M05.531, M05.532, M05.539, M05.541, M05.542, M05.549, M05.551, M05.552, M05.559, M05.561, M05.562, M05.569, M05.571, M05.572, M05.579, M05.59, M05.60, M05.611, M05.612, M05.619, M05.621, M05.622, M05.629, M05.631, M05.632, M05.639, M05.641, M05.642, M05.649, M05.651, M05.652, M05.659, M05.661, M05.662, M05.669, M05.671, M05.672, M05.679, M05.69, M05.7A, M05.70, M05.711, M05.712, M05.719, M05.721, M05.722, M05.729, M05.731, M05.732, M05.739, M05.741, M05.742, M05.749, M05.751, M05.752, M05.759, M05.761, M05.762, M05.769, M05.771, M05.772, M05.779, M05.79, M05.8A, M05.80, M05.811, M05.812, M05.819, M05.821, M05.822, M05.829, M05.831, M05.832, M05.839, M05.841, M05.842, M05.849, M05.851, M05.852, M05.859, M05.861, M05.862, M05.869, M05.871, M05.872, M05.879, M05.89, M05.9, M06.0A, M06.00, M06.011, M06.012, M06.019, M06.021, M06.022, M06.029, M06.031, M06.032, M06.039, M06.041, M06.042, M06.049, M06.051, M06.052, M06.059, M06.061, M06.062, M06.069, M06.071, M06.072, M06.079, M06.08, M06.09, M06.20, M06.211, M06.212, M06.219, M06.221, M06.222, M06.229, M06.231, M06.232, M06.239, M06.241, M06.242, M06.249, M06.251, M06.252, M06.259, M06.261, M06.262, M06.269, M06.271, M06.272, M06.279, M06.28, M06.29, M06.30, M06.311, M06.312, M06.319, M06.321, M06.322, M06.329, M06.331, M06.332, M06.339, M06.341, M06.342, M06.349, M06.351, M06.352, M06.359, M06.361, M06.362, M06.369, M06.371, M06.372, M06.379, M06.38, M06.39, M06.8A, M06.80, M06.811, M06.812, M06.819, M06.821, M06.822, M06.829, M06.831, M06.832, M06.839, M06.841, M06.842, M06.849, M06.851, M06.852, M06.859, M06.861, M06.862, M06.869, M06.871, M06.872, M06.879, M06.88, M06.89, M06.9

AND

Patient encounter during the performance period (CPT or HCPCS): 98000, 98001, 98002, 98003, 98004, 98005, 98006, 98007, 98008, 98009, 98010, 98011, 98012, 98013, 98014, 98015, 98016, 99202, 99203, 99204, 99205, 99212, 99213, 99214, 99215, 99341, 99342, 99344, 99345, 99347, 99348, 99349, 99350, 99424, 99426, G0402, G0468*

AND

An additional encounter with an RA diagnosis during the performance period or prior performance period that is at least 90 days before or after an encounter with an RA diagnosis during the performance period: M1376

NUMERATOR:

Patients who have been assessed for glucocorticoid use and for those on prolonged doses of prednisone > 5 mg daily (or equivalent) with improvement or no change in disease activity, documentation of a glucocorticoid management plan during the performance period.

Definitions:

Prolonged Dose – Doses > 6 months in duration.

Prednisone Equivalents – Determine using the following:

1 mg of prednisone = 1 mg of prednisolone; 5 mg of cortisone; 4 mg of hydrocortisone; 0.8 mg of triamcinolone; 0.8 mg of methylprednisolone; 0.15 mg of dexamethasone; 0.15 mg of betamethasone.

Glucocorticoid Management Plan – Includes documentation of attempt to taper steroids OR documentation of a new prescription for a non-glucocorticoid disease-modifying anti-rheumatic drug (DMARD) OR increase in dose of non-glucocorticoid DMARD dose for persistent RA disease activity at current or reduced dose.

Numerator Options:

Performance Met:

Patient not receiving glucocorticoid therapy (4192F)

OR

Performance Met:

Patient receiving ≤5 mg daily prednisone (or equivalent), or RA activity is worsening, or glucocorticoid use is for less than 6 months (G2112)

OR

Performance Met:

Patient receiving > 5 mg daily prednisone (or equivalent) for longer than 6 months, and improvement or no change in disease activity (G2113)

AND

Glucocorticoid Management Plan documented (0540F)

OR

Denominator Exception:

Documentation of medical reason(s) for not documenting glucocorticoid management plan (i.e., glucocorticoid prescription is for a medical condition other than RA) (0540F with 1P)

AND

Patient receiving > 5 mg daily prednisone (or equivalent) for longer than 6 months, and improvement or no change in disease activity (G2113)

OR

Performance Not Met:

Glucocorticoid dose was not documented, reason not otherwise specified (4194F with 8P)

OR

Performance Not Met:

Glucocorticoid management plan not documented, reason not otherwise specified (0540F with 8P)

AND

Patient receiving > 5 mg daily prednisone (or equivalent) for longer than 6 months, and improvement or no change in disease activity (G2113)

RATIONALE:

Glucocorticoids are an important part of RA treatment as they inhibit inflammation and may control synovitis. However,

long-term use of glucocorticoids, especially at high doses, should be avoided, due to the potential health complications. Monitoring length and dose of glucocorticoid treatment for patients with RA is integral to making other clinical decisions.

CLINICAL RECOMMENDATION STATEMENTS:

Low-dose oral glucocorticoids and local injections of glucocorticoids are highly effective for relieving symptoms in patients with active RA. The benefits of low-dose systemic glucocorticoids, however, should always be weighed against their adverse effects. The adverse effects of long-term oral glucocorticoids at low doses are protean and include osteoporosis, hypertension, weight gain, fluid retention, hyperglycemia, cataracts, and skin fragility, as well as the potential for premature atherosclerosis. These adverse effects should be considered and should be discussed in detail with the patient before glucocorticoid therapy is begun. For long term disease control, the glucocorticoid dosage should be kept to a minimum. For the majority of patients with RA, this means equal or less than 10 mg of prednisone per day. (ACR, 2002)

Grijalva, et al found nearly two-fold greater serious infection (OR1.78 1.47,2.15) at 5-10 mg of prednisone in RA as reported in JAMA 2011 Dec 7;306(21):2331-9. doi: 10.1001/jama.2011.1692. Epub 2011 Nov 6. Because of the dangers to patients associated with being on 5 to 10 mg doses of prednisone, optimal treatment is to aim for a dosage less than or equal to 5 mg.

2026 Clinical Quality Measure Flow Narrative for Quality ID#180: Rheumatoid Arthritis (RA): Glucocorticoid Management

Disclaimer: Refer to the measure specification for specific coding and instructions to submit this measure.

1. Start with Denominator
2. Check *Patients aged greater than or equal to 18 years on date of encounter*:
 - a. If *Patients aged greater than or equal to 18 years on date of encounter* equals No, do not include in *Eligible Population/Denominator*. Stop processing.
 - b. If *Patients aged greater than or equal to 18 years on date of encounter* equals Yes, proceed to check *Diagnosis for rheumatoid arthritis as listed in Denominator**.
3. Check *Diagnosis for rheumatoid arthritis(RA) as listed in Denominator**:
 - a. If *Diagnosis for rheumatoid arthritis(RA) as listed in Denominator** equals No, do not include in *Eligible Population/Denominator*. Stop processing.
 - b. If *Diagnosis for rheumatoid arthritis(RA) as listed in Denominator** equals Yes, proceed to check *Patient encounter during the performance period as listed in Denominator**.
4. Check *Patient encounter during the performance period as listed in Denominator**:
 - a. If *Patient encounter during the performance period as listed in Denominator** equals No, do not include in *Eligible Population/Denominator*. Stop processing.
 - b. If *Patient encounter during the performance period as listed in Denominator** equals Yes, proceed to check *An additional encounter with an RA diagnosis during the performance period or prior performance period that is at least 90 days before or after an encounter with an RA diagnosis during the performance period*.
5. Check *An additional encounter with an RA diagnosis during the performance period or prior performance period that is at least 90 days before or after an encounter with an RA diagnosis during the performance period*:
 - a. If *An additional encounter with an RA diagnosis during the performance period or prior performance period that is at least 90 days before or after an encounter with an RA diagnosis during the performance period* equals No, do not include in *Eligible Population/Denominator*. Stop processing.
 - b. If *An additional encounter with an RA diagnosis during the performance period or prior performance period that is at least 90 days before or after an encounter with an RA diagnosis during the performance period* equals Yes, include in *Eligible Population/Denominator*.
6. Denominator Population:
 - Denominator Population is all Eligible Patients in the Denominator. Denominator is represented as Denominator in the Sample Calculation listed at the end of this document. Letter d equals 80 patients in the Sample Calculation.
7. Start Numerator
8. Check *Patient not receiving glucocorticoid therapy*:
 - a. If *Patient not receiving glucocorticoid therapy* equals Yes, include in *Data Completeness Met and Performance Met*.
 - *Data Completeness Met and Performance Met* letter is represented in the Data

Completeness and Performance Rate in the Sample Calculation listed at the end of this document. Letter a¹ equals 20 patients in the Sample Calculation.

- b. If *Patient not receiving glucocorticoid therapy* equals No, proceed to check *Patient receiving less than or equal to 5 mg daily prednisone (or equivalent), or RA activity is worsening, or glucocorticoid use is for less than 6 months*.
9. Check *Patient receiving less than or equal to 5 mg daily prednisone (or equivalent), or RA activity is worsening, or glucocorticoid use is for less than 6 months*:
 - a. If *Patient receiving less than or equal to 5 mg daily prednisone (or equivalent), or RA activity is worsening, or glucocorticoid use is for less than 6 months* equals Yes, include in *Data Completeness Met and Performance Met*.
 - *Data Completeness Met and Performance Met* letter is represented in the Data Completeness and Performance Rate in the Sample Calculation listed at the end of this document. Letter a² equals 10 patients in the Sample Calculation.
 - b. If *Patient receiving less than or equal to 5 mg daily prednisone (or equivalent), or RA activity is worsening, or glucocorticoid use is for less than 6 months* equals No, proceed to check *Patient receiving greater than 5 mg daily prednisone (or equivalent) for longer than 6 months, and improvement or no change in disease activity AND glucocorticoid management plan documented*.
10. Check *Patient receiving greater than 5 mg daily prednisone (or equivalent) for longer than 6 months, and improvement or no change in disease activity AND glucocorticoid management plan documented*:
 - a. If *Patient receiving greater than 5 mg daily prednisone (or equivalent) for longer than 6 months, and improvement or no change in disease activity AND glucocorticoid management plan documented* equals Yes, include in *Data Completeness Met and Performance Met*.
 - *Data Completeness Met and Performance Met* letter is represented in the Data Completeness and Performance Rate in the Sample Calculation listed at the end of this document. Letter a³ equals 10 patients in the Sample Calculation.
 - b. If *Patient receiving greater than 5 mg daily prednisone (or equivalent) for longer than 6 months, and improvement or no change in disease activity AND glucocorticoid management plan documented* equals No, proceed to check *Documentation of medical reason(s) for not documenting glucocorticoid management plan AND patient receiving greater than 5 mg daily prednisone (or equivalent) for longer than 6 months, and improvement or no change in disease activity*.
11. Check *Documentation of medical reason(s) for not documenting glucocorticoid management plan AND patient receiving greater than 5 mg daily prednisone (or equivalent) for longer than 6 months, and improvement or no change in disease activity*:
 - a. If *Documentation of medical reason(s) for not documenting glucocorticoid management plan AND patient receiving greater than 5 mg daily prednisone (or equivalent) for longer than 6 months, and improvement or no change in disease activity* equals Yes, include in *Data Completeness Met and Denominator Exception*.
 - *Data Completeness Met and Denominator Exception* letter is represented in the Data Completeness and Performance Rate in the Sample Calculation listed at the end of this document. Letter b equals 10 patients in the Sample Calculation.
 - b. If *Documentation of medical reason(s) for not documenting glucocorticoid management plan AND patient receiving greater than 5 mg daily prednisone (or equivalent) for longer than 6 months, and improvement or no change in disease activity* equals No, proceed to check *Glucocorticoid dose was not documented*,

reason not otherwise specified.

12. Check *Glucocorticoid dose was not documented, reason not otherwise specified*:

- a. If *Glucocorticoid dose was not documented, reason not otherwise specified* equals Yes, include in *Data Completeness Met and Performance Not Met*.
 - *Data Completeness Met and Performance Not Met* letter is represented in the Data Completeness in the Sample Calculation listed at the end of this document. Letter c¹ equals 20 patients in the Sample Calculation.
- b. If *Glucocorticoid dose was not documented, reason not otherwise specified* equals No, proceed to check *Glucocorticoid management plan not documented, reason not otherwise specified AND patient receiving greater than 5 mg daily prednisone (or equivalent) for longer than 6 months, and improvement or no change in disease activity*.

13. Check *Glucocorticoid management plan not documented, reason not otherwise specified AND patient receiving greater than 5 mg daily prednisone (or equivalent) for longer than 6 months, and improvement or no change in disease activity*:

- a. If *Glucocorticoid management plan not documented, reason not otherwise specified AND patient receiving greater than 5 mg daily prednisone (or equivalent) for longer than 6 months, and improvement or no change in disease activity* equals Yes, include in *Data Completeness Met and Performance Not Met*.
 - *Data Completeness Met and Performance Not Met* letter is represented in the Data Completeness in the Sample Calculation listed at the end of this document. Letter c² equals 0 patients in the Sample Calculation.
- b. If *Glucocorticoid management plan not documented, reason not otherwise specified AND patient receiving greater than 5 mg daily prednisone (or equivalent) for longer than 6 months, and improvement or no change in disease activity* equals No, proceed to check *Data Completeness Not Met*.

14. Check *Data Completeness Not Met*:

- a. If *Data Completeness Not Met*, the Quality Data Code or equivalent was not submitted. 10 patients have been subtracted from the Data Completeness Numerator in the Sample Calculation.

Sample Calculations

Data Completeness equals Performance Met (a¹ plus a² plus a³ equals 40 patients) plus Denominator Exception (b equals 10 patients) plus Performance Not Met (c¹ plus c² equals 20 patients) divided by Eligible Population/Denominator (d equals 80 patients). All equals 70 patients divided by 80 patients. All equals 87.50 percent.

Performance Rate equals Performance Met (a¹ plus a² plus a³ equals 40 patients) divided by Data Completeness Numerator (70 patients) minus Denominator Exception (b equals 10 patients). All equals 40 patients divided by 60 patients. All equals 66.67 percent.

*See the posted measure specification for specific coding and instructions to submit this measure.

NOTE: Submission Frequency: Patient-Process

The measure diagrams were developed by CMS as a supplemental resource to be used in conjunction with the measure specifications. They should not be used alone or as a substitution for the measure specification.
